

UTN - Facultad Regional Mendoza

The Universidad Tecnológica Nacional (UTN) (Workers University) was created in 1948 with the purpose of providing technical education to the Argentine people.

The Local School (*Facultad Regional Mendoza*) is one of the 29 academic institutions of the UTN in Argentina. Since then, more than 2900 engineers have been graduated in the five university courses from our institution. The main School campus is located in Mendoza and it has an outbuilding in Rivadavia, which is 60 km from Mendoza. The School also has other sites where it carries out investigation and extension activities:

- -Meteorological Observatory located in San Martín Park.
- -IT Institute
- -Department of Foreign Languages

The Local School

Our local School has a covered area of more than 26 thousand square meters, including:

- -The Outbuilding located in Rivadavia, which offers undergraduate courses
- -Investigation Site in the Meteorological Observatory located in San Martín Park
- -Tests and Investigation Laboratories
- -Auditorium for conferences, art exhibitions and others
- -A building for science, technology and postgraduate studies
- -Administration, management and TIC (Communication and IT) Area
- -Training Center of Foreign Languages and Computer Science
- -Building for investigation (*Currently in planning stage*)
